Gross head of water [m]	
--------------------------------	--

(Difference of water level at intake and water level at outlet to drain)

Net head of water [m]	
------------------------------	--

(Net head = gross head less frictional loss in penstock, etc.)

Available water quantity [l/s]	
---------------------------------------	--

maximum (if available)

average (if available)

minimum (if available)

Please provide available data about permanent water quantity (best figures per month)!

Sufficient water quantity available ? (please tick the relevant box)

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>

Type of Operation

Stand alone	Power supply also to public grid
<input type="checkbox"/>	<input type="checkbox"/>

(please tick the relevant box)

Type of Generator

synchronous generator	asynchronous generator
<input type="checkbox"/>	<input type="checkbox"/>

(please tick the relevant box)

Voltage and frequency:

<input type="text"/>
